EDUCATION

-
- M.S., Pennsylvania State University**, State College, Pennsylvania August 2025 – May 2026
- Major: Computer Science (Computer Science and Engineering)
 - Research Area: Natural Language Processing (NLP), Large Language Model (LLM)
- Ph.D. (incomplete), Pennsylvania State University**, State College, Pennsylvania August 2023 – May 2026
- Major: Computer Science (Computer Science and Engineering)
 - Research Area: Natural Language Processing (NLP), Large Language Model (LLM)
- B.S., University of Wisconsin**, Madison, Wisconsin September 2021 – May 2023
- Major: Computer Science (College of Letters)
 - GPA: 3.77/4.00
- B.E. (transferred out), Arizona State University**, Tempe, Arizona August 2019 – April 2021
- Major: Computer Science (Ira A. Fulton Schools of Engineering)
 - Award: New American University Scholarship UG 2019 – 2021
 - GPA: 3.98/4.00

RESEARCH FOCUS

Natural Language Processing (NLP) | Large Language Models (LLMs) | Generative AI | AI4Science | Mathematical Word Problems | Multilingual | Bias & Hallucinations of LLMs

EXPERIENCES

Research/Teaching Assistant, Pennsylvania State University, State College, PA August 2023 – Present

- Department: College of Engineering
- Supervised by Prof. [Wenpeng Yin](#).
- conducting intensive research on LLMs for Math Word Problems, aiming to enable more LLMs to effectively and successfully solve mathematical problems

Workshop co-organizer, IJCAI2024, Jeju South Korea March, 2024 - July 2024

- Assisted a professor in creating a website and organizing paper invitations for the workshop.
- Collaborated with conference officials to ensure the event adhered to the schedule, facilitated participant Q&A sessions, supported presentations, and coordinated paper presentations and the awarding of the best paper accolade.

Research Internship, ADAS Verification Technology Team, Suresoft, South Korea May, 2022 – July, 2022

- Collected sensor data of ADAS vehicles including Lidar, IMU, GPS, and Camera, and created various testing scenarios and error determination filters for ADAS
- Applied Python and C# to create filters that find the point where ADAS caused the judgment error during driving and left a mark on the timeline
- Presented summarized contents of various papers related to ADAS and ADAS testing every three weeks to team members to help widen their knowledge

SERVICES

Conference Paper Reviewer January 2026 – Present

- Serving at COLM
- Topics: Large Language Models, Natural Language Processing, Artificial Intelligence
